AEFES

We participated in the AEFES teleconference to evaluate the company's Q4 2023 financial results, current operations, and future outlook. Anadolu Efes holds a leading position in the production and marketing of beer, malt, and soft drinks in both Turkey and international markets. The company stands out with its strong operational structure and high export rates, along with its notable ability to generate cash. The management expects to maintain a similar success in 2024 following a performance that exceeded expectations in 2023. The meeting highlighted the unexpectedly positive performance in the last quarter of 2023 and strong operational profitability.

Key takeaways of the meeting

Above-expectation performance in the last quarter of 2023... In the beer segment, the solid performance demonstrated since the beginning of the year has led to a significant increase in volume and exceeded expectations. At the heart of this success are the new product launches and effective brand strategies implemented in the mid-segment; these strategies have strengthened the company's position in the markets it operates in.

Strong operational profitability... Despite facing numerous challenges throughout the year, the company has achieved significant successes. Conditions such as natural disasters in Turkiye and Pakistan, contraction trends in some of the markets it operates in, and the necessity to implement aggressive pricing strategies due to a high inflationary environment have created significant pressure on the business. Nevertheless, the company has managed to strengthen its position in most markets and has achieved exceptional Free Cash Flow thanks to high turnover and strong operational profitability.

2024 outlook... The company shares optimistic forecasts for 2024, taking into account adjustments for inflation accounting. Additionally Coca-Cola Bangladesh Beverages Limited is expected to make a more significant contribution to the company's financial results in 2024.
